

# Green Enterprise Development

Green Manufacturing Specialist Certificate Prep & Exam

## Join us for the Green Manufacturing Specialist Certificate Preparation Workshop & Exam December 13-15, 2011 - Onsite or Online

Earn your **SME Green Manufacturing Specialist Certificate** in just **2½ Days**. During the first two days, available onsite or online through streaming video, we will review the exam body of knowledge and associated Purdue TAP Green Enterprise Development materials. In order to help you understand topics and questions that may appear on the SME Green Manufacturing exam, attendees will participate in practice exercises and review Green Enterprise Development Materials.

### Review Topics include:

- Sustainability and global conditions
- Material and solid waste management
- Energy management
- Chemical waste management and green chemistry
- Climate change and air emissions management
- Supply water and waste water management
- Environmental business management

*"The GreenED program addresses the change in thinking in manufacturing work to actively look for ways to incorporate more sustainable, environmentally friendly improvements that have a positive effect on the bottom line. So attaining the SME Green Manufacturing Specialist credential signifies knowledge in the prevention of waste, energy conservation and clean manufacturing processes."*

- Jeannine Kunz, Director of marketing and professional development, Society of Manufacturing Engineers
