Aerospace & Defense Manufacturing covers the business improvement practices and advanced technologies that have an impact on engine, airframe, rotary wing, naval, space, land-based systems, avionics, defense electronics, and materials manufacturing. Unique authoritative editorial focuses on the global trends and viewpoints from respected top industry professionals.

Medical Additive Manufacturing covers one of the fastest growing application areas of additive manufacturing. Whether as a better way to mass produce medical devices or to enable patient-specific custom devices, AM has distinct advantages for medicine. This Yearbook provides information on the latest technologies and trends in medical additive manufacturing, including viewpoints from industry leaders and insights into technical developments that are moving the field forward.

Motorized Vehicle Manufacturing evaluates major industry segments including OEMs and suppliers, alternative powertrains, regulation, and sustainability. Executives, advocates, and observers offer viewpoint articles that cover automotive; on-highway & off-highway vehicles and equipment; recreational vehicle; agricultural/mining; heavy truck; and motorcycle manufacturing.
