Society of Manufacturing Engineers
Dearborn, Michigan

CONTENTS

PREFACE.....	xiv
1 ERGONOMICS IN PLANT OPERATIONS.....	1
<i>Gavriel Salvendy, NEC Professor of Industrial Engineering, Purdue University, West Lafayette, IN</i>	
2 PARTICIPATORY ERGONOMICS—A PRACTICAL GUIDE FOR THE PLANT MANAGER	5
<i>Donald Day, Consultant in Ergonomics and Health Promotion, Greenwood Village, CO</i>	
What is Participatory Ergonomics?	5
The Benefits	6
<i>Is Participatory Ergonomics Best?, Assess Readiness, Moving Toward Participatory Ergonomics, Getting Started, Analysis Process</i>	
Keeping it Going	20
<i>Monitoring Progress and Evaluating the Process, Methods</i>	
Opportunities	26
3 LOWERING COSTS THROUGH ERGONOMICS	29
<i>Hal W. Hendrick, Emeritus Professor of Human Factors, University of Southern California</i>	
Case Studies	30
<i>Forestry Industry, Material Handling Systems, Workstation Redesign, Reducing Work-related Musculoskeletal Disorders</i>	
Human Factors Test and Evaluation	38
<i>Macroergonomics</i>	
4 MANUFACTURING WORKSTATION DESIGN	43
<i>Biman Das, Professor, Industrial Engineering, Department of Industrial Engineering, Dalhousie University, Halifax, Nova Scotia, Canada</i>	
Applying Engineering Anthropometry to Workstation Design ...	44
Adjusting Anthropometric Data	45
Determining Workstation Design Parameters	45
Determining Workstation Dimensions	48
<i>Work Height, Normal and Maximum Reaches, Lateral Clearance, Angle of Vision and Eye Height</i>	
Case Studies	50
<i>Supermarket Checkstand Workstation</i>	
Computerized Human Modeling Programs for Workstation Design	54
<i>CYBERMAN, COMBIMAN, CREW CHIEF, JACK, SAMMIE, MANNEQUIN</i>	

5	A DESIGN AND SELECTION GUIDE FOR HAND HELD TOOLS	65
	<i>F. Aghazadeh, Associate Professor, S.M. Waly, Assistant Professor, Industrial and Manufacturing Systems Engineering Department, Louisiana State University, Baton Rouge, LA</i>	
	Evolution of Tools	65
	<i>Two Categories, Proper Matching, Anatomy of the Upper Extremities</i>	
	Injuries and Illnesses from Hand Held Tools	71
	<i>A Survey, Injury Parameters</i>	
	Principles of Hand Tool Design	75
	<i>Effects of Grip Type, Size, and Shape; Effects of Gloves; Effects of Wrist Position; Effects of Tool Weight and Muscle Group</i>	
	Safety Considerations	81
6	COMPUTER-AIDED DESIGN FOR ERGONOMICS AND SAFETY	87
	<i>Markku Aaltonen, Project Manager, Finnish Institute of Occupational Health, Vantaa, Finland Markkus Mattila, Professor, Vice-Rector, Tampere University of Technology, Tampere, Finland</i>	
	Gathering Safety Data	87
	<i>Standardization</i>	
	Safety Management Information Systems	89
	<i>Supportive Safety Information; Job Risk Assessment and Participatory Safety and Health; Training and Instructional Software Packages; Simulation Softwares for Ergonomics; Job Design Tools for Ergonomics; Integrated Systems for Occupational Safety, Health, and Ergonomics; Examples of Computer-aided Design for Ergonomics; Interactive Ergonomic-oriented Production System Design; TRANSOM JACK™ Human Modeling; IGRIP Software</i>	
	Integration of Safety and Ergonomics	102
7	ERGONOMICS TRAINING AND EDUCATION FOR WORKERS AND MANAGERS	107
	<i>Marilyn Joyce, Director, The Joyce Institute/A Unit of Arthur D. Little, Seattle, WA</i>	
	Characteristics of Good Training	107
	<i>Nature of the Adult Learner, Role of the Trainer/Facilitator, The Environment</i>	
	Five Phases	110
	<i>Planning, Development, Delivery, Measuring the Impact, Integration and Improvement</i>	
	Job-specific Training	117

Managers; Health and Safety Professionals; Manufacturing Engineers; Supervisors, Technicians, Ergonomics Team Leaders, Labor Representatives; Employees; Medical and Human Resource Professionals

8	ASSESSING PHYSICAL WORK LOAD	121
	<i>Veikko Louhevaara, Professor, Regional Institute of Occupational Health and University of Kuopio, Kuopio, Finland</i>	
	<i>Juhani Smolander, Senior Researcher, Tatiana Aminoff, Researcher, Juhani Ilmarinen, Professor, Finnish Institute of Occupational Health, Vantaa, Finland</i>	
	Physical Load at Work	121
	<i>Physiology of Muscular Work, Static Muscle Work, Effect of the Size of Working Muscle Mass, Muscular Overload, Field Methods for Assessing Physical Overload, Heavy Dynamic Muscle Work, Manual Material Handling, Static Muscle Work, Repetitive Work, Physical Work Load Assessment in Practice</i>	
	Preventing Physiological Overload	131
9	STATIC WORK LOAD AND ENDURANCE TIMES.....	135
	<i>Nico J. Delleman, Jan Dul, NIA TNO, Amsterdam, The Netherlands</i>	
	Maintaining Working Postures	135
	<i>Perceived Discomfort, Maximum Holding Time, Maximum Holding Time versus Discomfort, Maximum Acceptable Level of Discomfort</i>	
	Workstation Design and Adjustment	139
	<i>Sewing Machine Operation, Press Operation, Hand Positions</i>	
	Standards	145
	<i>Scope, Contents</i>	
	Work-rest Model	146
	<i>Software, Example</i>	
10	WORKER STRENGTH EVALUATION: ERGONOMIC AND LEGAL PERSPECTIVES	153
	<i>Patrick G. Dempsey, Researcher, Liberty Mutual Research Center for Safety and Health, Hopkinton, MA</i>	
	Musculoskeletal Disorders	153
	<i>Ergonomic Job Design</i>	
	Methods of Strength Evaluation	154
	<i>Isometric Testing, Isokinetic Testing, Isoinertial Testing, Comparing Strength Evaluation Methods, Selecting a Strength Evaluation Method</i>	
	Legal Implications	158
	<i>The Americans with Disabilities Act, Examples</i>	

11 METHODS FOR EVALUATING POSTURAL WORK LOAD	167
<i>W. Monroe Keyserling, Professor, Industrial and Operations Engineering, The University of Michigan, Ann Arbor, MI</i>	
Work Posture	167
<i>Health Effects of Awkward Posture, Productivity Effects of Awkward Posture, Posture Analysis Methods, Exposure Assessment Methods, Root Cause Analysis Methods</i>	
A Case Study	181
<i>Pre-change Analysis, Ergonomic Changes, Post-change Analysis</i>	
12 MANUAL MATERIAL HANDLING: DESIGN DATA BASES.....	189
<i>Christin L. Shoaf, Ashraf M. Genaidy, University of Cincinnati, Cincinnati, OH</i>	
Models	189
Examples	200
Reducing Exposure to Manual Material Handling Hazards ...	203
13 ASSESSMENT OF MANUAL LIFTING—THE NIOSH APPROACH	205
<i>Thomas R. Waters, Research Physiologist, Vern Putz-Anderson, Ergonomist, National Institute for Occupational Safety and Health, Applied Psychology and Ergonomics Branch, Cincinnati, Ohio</i>	
The Body of Work	205
<i>Recommended Weight Limit (RWL), Measurement Requirements, Lifting Index (LI), Miscellaneous Terms, Equation Limitations, Horizontal Component, Vertical Component, Distance Component, Asymmetry Component, Frequency Component, Special Frequency Adjustment Procedure, Coupling Component</i>	
Procedures	223
<i>Step 1: Collect Data, Step 2: Single- and Multi-task Procedures</i>	
Applying the Equations	230
<i>Using the RWL and LI to Guide Ergonomic Design, Rationale and Limitations for LI, Job-related Intervention Strategy</i>	
Example Problems	231
14 PERSPECTIVE ON LIFTING BELTS FOR MATERIAL HANDLING	243
<i>Dr. Malgorzata J. Rys, Assistant Professor, Department of Industrial and Manufacturing Systems Engineering, Kansas State University, Manhattan, KS</i>	
<i>Dr. Luis Rene Contreras, Professor, Department of Industrial and Manufacturing Engineering, Institute of Engineering and Technology, Autonomous University of Ciudad Juarez, Ciudad Juarez, Chihuahua, Mexico</i>	

Prevention Attempts	244
<i>Personnel Training, Personnel Selection, Job Design</i>	
External Support Devices	245
<i>Back Support Belts, Weight-lifting Belts, Industrial Back Support Belts, Unknown Factors</i>	
Rationale for Using Back Support Belts	249
<i>Effect of Back Support Belts, Epidemiological Research</i>	
Physical Research	253
15 TRAINING AND EDUCATION IN BACK INJURY PREVENTION	265
Glenda L. Key, KEY Method, Minneapolis, MN	
Impact Points	265
<i>Prior to the Hire, After the Hire</i>	
Prevention Programs	267
<i>Audit Assessment, Back Belts, Education, Ergonomics, Exercise, Fitness</i>	
Functional Capacity Assessments	273
<i>FCA Principles, FCA Reporting and Outcomes, FCA Standardization</i>	
Functional Therapy	280
<i>Job Analysis</i>	
Job Placement Assessments	282
<i>JPA Outcomes, "Tool Box Talks"</i>	
16 AN OVERVIEW OF UPPER EXTREMITY DISORDERS	287
J. Steven Moore, Professor of Engineering,	
Co-director of NSF I/UCRC in Ergonomics,	
Texas A&M University, College Station, TX	
Five Disorders	287
<i>Trigger Finger and Trigger Thumb, de Quervain's Tenosynovitis, Peritendinitis, Lateral Epicondylitis, Carpal Tunnel Syndrome</i>	
17 CUMULATIVE TRAUMA DISORDERS IN INDUSTRY	305
Fadi A. Fathallah,	
Patrick G. Dempsey,	
Barbara S. Webster,	
Liberty Mutual Research Center for Safety and Health, Hopkinton, MA	
What are CTDs?	305
<i>CTD Incidence and Costs, Common CTDs in Industry, CTD Risk Factors</i>	
Surveillance Methods	311
<i>Passive Surveillance, Active Surveillance</i>	
Prevention and Control of CTDs in Industry	314

18 ANSI-Z365 STANDARD: CONTROL AND PREVENTION OF CUMULATIVE TRAUMA DISORDERS	317
<i>Marvin J. Dainoff, Professor, Psychology, and Director, Center for Ergonomic Research, Miami University, Oxford, OH</i>	
Developing ANSI-Z365	317
<i>The ANSI Role</i>	
The Process	318
<i>The Accredited Standards Committee, Compliance</i>	
Structure and Content	320
<i>Components</i>	
Issues and Concerns	323
<i>Additional Factors</i>	
Other Standards	324
19 MANAGING WORK-RELATED MUSCULOSKELETAL INJURIES.....	327
<i>Gary A. Mirka, Assistant Professor, Carolyn M. Sommerich, Assistant Professor, North Carolina State University, Raleigh, NC</i>	
Three-Tier System	327
<i>Widespread Commitment</i>	
Management's Role	328
Human Resources' Role	331
Engineering's Role	340
The Supervisor's Role	342
The Operator's Role	344
Medical Management's role	346
The Safety Specialist's Role	347
Roles for Other Production Support Groups	348
<i>Integration</i>	
20 ERGONOMICS: PART OF CONTINUOUS IMPROVEMENT	351
<i>Steven L. Johnson, Professor of Industrial Engineering, University of Arkansas, Fayetteville, AR</i>	
Terminology	352
<i>Right and Wrong Terms</i>	
Effective Implementation of Ergonomics	353
<i>Policy and Procedures Document, Employee Involvement, Ergonomics Committee, Surveillance Methods, Job-site Analysis Methods, Ergonomics Training</i>	
Medical Management Program	365
<i>Prevention</i>	

21 VIBRATION-INDUCED CUMULATIVE TRAUMA DISORDERS....	369
<i>Donald E. Wasserman, Human Vibration Consultant, Cincinnati, OH</i>	
The Nature of Vibration	369
Whole-body Vibration	370
Hand-arm Vibration	371
Vibration Measurements	373
Standards	
Controlling Vibration in the Workplace	376
22 EVALUATING ERGONOMICS PROGRAMS	381
<i>Gary B. Orr, Industrial Engineer, OSHA, Office of Ergonomic Support, Department of Labor-Occupational Safety and Health Administration, Washington, DC</i>	
<i>David C. Alexander, President, Auburn Engineers, Auburn, AL</i>	
The Ergonomics Process and Its Evaluation	382
Management Commitment, Employee Involvement	
Control and Prevention of Occupational Health Hazards	386
Work Site Analysis, Hazard Prevention, Medical Management, Training, The Bottom Line	
Control of Conditions Affecting Performance	391
Evaluating Products of the Organization	392
Outreach within the Trade	393
Contributions to the Technical/Legislative Community	394
23 AUDITING ERGONOMICS	397
<i>Colin G. Drury, Professor, State University of New York at Buffalo, Department of Industrial Engineering, Buffalo, NY</i>	
Measurement, Change, and Auditing	397
Why Audit Ergonomics?	
Choices for an Audit System	399
Types of Checklists, Audit Design	
How to Audit Ergonomics	402
An Ergonomics Audit Example	407
Lessons from Auditing	409
24 ECONOMIC EVALUATIONS OF ERGONOMIC INTERVENTIONS	413
<i>James R. Buck, Department of Industrial Engineering, University of Iowa, Iowa City, IA</i>	

Benefits and Costs	414
<i>Interest Calculations and Discounted Cash Flows</i>	
Inspection Economics	425
<i>Inspection Costs, Rate Considerations in Inspection, Location of the Inspection Station</i>	
Economics of Learning	430
<i>Training and Transfer</i>	
Lifting Belts and Economics	436

25 WORLDWIDE CORPORATE ERGONOMICS

EFFORTS—USA 439

**Brian Peacock, Manager, Manufacturing Ergonomics Laboratory,
General Motors Corporation**

The Growth of Ergonomics	440
<i>The Profession</i>	
Polarization of Physical and Cognitive Ergonomics	442
Physical Ergonomics in Industry	443
<i>Organizational Factors, Ergonomics Programs, Cumulative Trauma Disorders</i>	
Commercial Opportunities	447
<i>Training, Job Analysis, Physical Devices</i>	
The Problem of Science and Standards	453
<i>Consensus, Ergonomics Standards</i>	
Exposure—The Time Factor	458
<i>Teams</i>	
Objectives of Ergonomics	460
<i>Fitting the Tasks, Preventing Unwanted Outcomes</i>	
Anthropology of Work	462

26 CORPORATE ERGONOMIC EFFORTS IN GERMANY 465

**Hans-Jörg Bullinger, Professor, Head,
Fraunhofer Institute for Industrial Engineering (IAO), Stuttgart, and Head
Institute for Human Factors and Technology Management (IAT),
University of Stuttgart, Germany**

**Martin Braun, Research Scientist,
Institute for Human Factors and Technology Management (IAT),
University of Stuttgart, Germany**

**Rainer Schopp, Head Product Design,
Fraunhofer Institute for Industrial Engineering (IAO),
Stuttgart, Germany**

Evolution of Ergonomics	465
Motives of Ergonomics	466
<i>Economic Efficiency, Humanization, Normative and Legal Aspects, Sociodemographic Development</i>	

Institutions Involved in Ergonomics	468
<i>Public Institutions and Programs, Science and Research Institutions</i>	
Ergonomic Design	472
<i>Goals, Applications, Design Requirements and Methods, Examples of Ergonomic Design</i>	
27 CORPORATE ERGONOMIC EFFORTS IN SWEDEN	485
Åsa Gabrielsson,	
Jörgen Eklund,	
<i>Division of Industrial Ergonomics,</i>	
<i>and Center for Studies of Humans, Technology and Organization,</i>	
<i>Linköping University, Sweden</i>	
<i>Gunnela Westlander, Professor, Division of Industrial Ergonomics,</i>	
<i>Linköping University, Sweden</i>	
Strategies on the National Level	486
<i>Internal Control, Impact of the Swedish Foundation of Work Life</i>	
Ergonomics as a Professional Field	490
Ergonomic Equipment for Industrial Production	490
Cases from the Manufacturing and Service Industries	491
<i>The Case of ABB, Automotive Cases—Volvo and Saab,</i>	
<i>Sociotechnical Job Design in Sawmills, Service Industry—Tools for Ergonomic Improvements</i>	
28 ERGONOMICS AND TQM	505
<i>Holger Luczak, Professor,</i>	
<i>Kai Krings,</i>	
<i>Stefan Gryglewski,</i>	
<i>Georg Stawowy,</i>	
<i>Institute of Industrial Engineering and Ergonomics, Aachen, Germany</i>	
TQM Philosophy	505
Objectives of Ergonomics	508
<i>Ergonomics as a Change Agent</i>	
Health Promotion in TQM	514
<i>Occupational Safety and Health as a Quality Target, Economics and Health Promotion</i>	
Organizational Development through Health Promotion	523
<i>Areas of Conflict, The Problem of Applying TQM</i>	
INDEX	533
